

Nice Mirror

Copper Free and Lead Free Mirror

Unparalleled Anti-Corrosion Properties

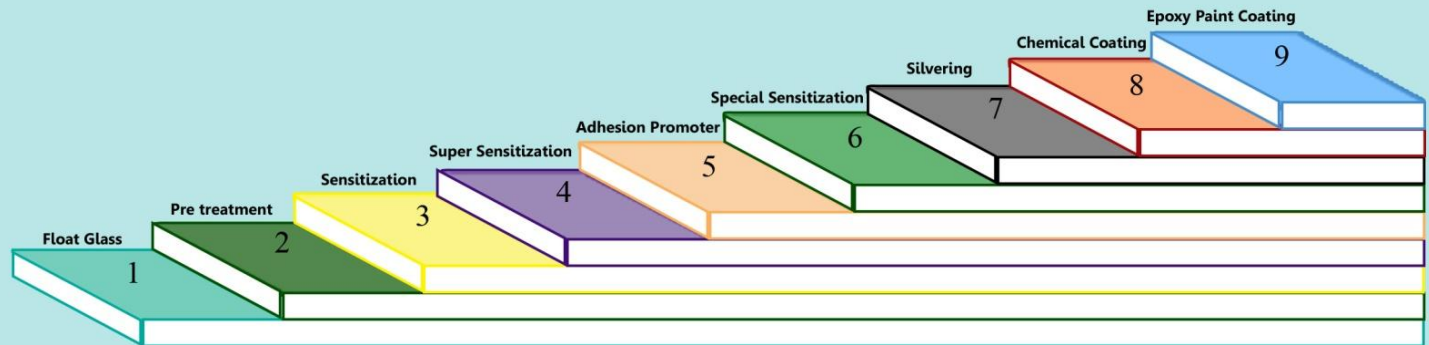

San Francisco Mirror Corporation

Nice Mirror (Copper Free & Lead Free)

The elimination of copper in the mirror manufacturing process has significantly improved the quality of mirrors. The outstanding properties of Nice Mirror far exceed today's industry standards.

Advantages and Benefits

Environment Friendly manufacturing process produces less waste and ensures easier onward recycling. It also complies with RoHS regulation which restricts certain dangerous substances.

Thus, Nice Mirror helps achieve LEED certification and “green building” designation.

Enhanced Durability - Nice Mirror is proven to be superior to conventional mirrors in all accelerated tests. It has unparalleled anti-corrosion properties and resistance to humidity and aggressive agents commonly found in cleaning products.

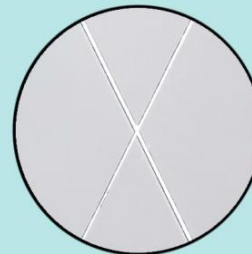

Quality Test Results are available upon request.

Outstanding Optical Quality - Nice Mirror gives clear, brilliant and exact reflections of images and greatly contributes to the accent and depth of an interior design.

Ease in Processing - Due to the strength of its protective coating, Nice Mirror can accommodate cutting, drilling and edgeworks without compromising the mirror's overall quality.

Nice Mirror had passed the following tests:

1. Salt Spray Test 720 hours - SGS:HL10137A/2012
2. RoHS - SGS:CE/2012/41359
3. REACH - SGS:CC/2012/40027C
4. CASS Test (ASTM B368)

Nice Mirror

Silver Mirror
